Your Safety is Our Priority: Safety Manual for our Application Users

Safety for Nearby, your safety and feeling of security while using our application is of utmost concern for us. Therefore, we have implemented the following safety features:

Location and Area Functionality:

- 📍 You have the ability to approve the location functionality at you discretion.
- 📍 If you check-in to an area (such as Stockholm) or a specific location (like a restaurant) other users can see you location and contact you. To check out, simply press the location pin.
- 📍 If you move more than 50 meters away from a checked -in location, you will automatically be checked out.

Online Visibility:

- 📍 An indicator will show your online status, replacing the green dot. Got to settings to turn off this feature.

Communication:

- 📍 Mutual agreement is essential for us to ensure secure communication between users. In order to communicate with someone, both parties must approve the communication before the text field becomes available.

Followers:

- 📍 Users can request to follow you, and it is up to you to approve your followers. The follower functionality allows you to filter and see only the users you follow. This function also works in events; create public events and make them visible only to followers.

Block & Report:

- 📍 You have the ability to block and report other users on our platform. By doing so, you will no longer be visible to those users, ensuring a safer and more comfortable experience. In your settings, you also have the option to unblock and undo any reports on other users if you choose to do so.
